RESEARCH EXPERIENCE

Research Assistant (Centre for the Study of African Economics)	Oxford, United Kingdom
<i>Department of Economics, University of Oxford</i>	Oct 2025 – Present
• Reviewing literature in remote learning, anticipatory action and development economics to conduct baseline survey design	
• Designing High Frequency Check on incoming survey data using Python.	
Research Assistant of AI and Behavioral Science	Taipei, Taiwan
<i>Department of Economics, National Taiwan University</i>	Jul 2023 – Mar 2024
• Designed and replicated psychological tasks to study GPT and other large language models' behavior.	
• Conducted 3-day fear conditioning experiments and analyzed subjects' skin conductance response using MATLAB on more than 20 subjects.	
Econometrics Project: The Study of Fertility in Taiwan	Taipei, Taiwan
<i>Department of Economics, National Taiwan University</i>	Jan 2023 – Jun 2023
• Analyzed the long-term impact of educational disparities on women's fertility choices with Fuzzy Regression Discontinuity Design on more than 15,000 samples using STATA.	
• Identified a 0.32 reduction in the number of children associated with an additional year of education.	
Research Assistant of Group Decision Making	Taipei, Taiwan
<i>Department of International Business, National Taiwan University</i>	Sept 2022 – Mar 2024
• Designed 4-players simultaneous decision making experiments using the oTree Python package, implemented on more than 100 subjects.	
• Conducted subsequent MRI experiments with over 50 subjects and analyzed behavioral results using R.	
Marketing Research Project: Consumer Preference Analysis and Product Design	Taipei, Taiwan
<i>Department of International Business, National Taiwan University</i>	Sept 2021 – Jan 2022
• Designed surveys to analyze people's traits, preferences, desired products, and brand awareness.	
• Analyzed over 400 survey responses using SPSS to gain insights into customer profiles and implemented the result on newly designed product and advertisement.
